

Hassan Munther Abdul-Wahid

Civil Engineer | Assistant Engineer, Site Supervision & Office Engineer

Basra - Khor Al-Zubair, Iraq | Phone: +964 783 895 3531 | Email: hasanmthr02@gmail.com

Portfolio: [civil-eng-pro.vercel.app](#) | LinkedIn: [hasanmundher](#)

PROFESSIONAL SUMMARY

Dedicated and innovative Civil Engineer with a solid foundation in structural design, site supervision, and civil construction. Proficient in industry-standard structural analysis and design tools including STAAD.Pro, AutoCAD, Revit, ETABS, and SAFE. Combines practical field surveying, optical level surveying, and site inspection expertise with specialized engineering software development, having developed an Android civil engineering calculation app (CivilEng) and the engineering web platform (Civil Eng Pro). Certified in OSHA safety, QA/QC management, and MS Project.

EDUCATION

Bachelor of Science in Civil Engineering | Shatt Al-Arab University, Iraq (2025 - 2026)

- Graduation Project:** Structural Analysis & Complete Design of a Multi-Story Steel Building (G+3) using STAAD.Pro, implementing AISC standards for wind, seismic, and structural integrity analysis.

WORK & FIELD EXPERIENCE

Civil Engineering Site Intern | Al-Farah Residential Complex, Basra (July 2025)

- Conducted field supervision across construction phases, reading and auditing architectural and structural blueprints to ensure precise on-site compliance.
- Operated Auto Level instruments to establish elevations, axis lines, and benchmark levels for structural works.

Summer Intern | General Company for Fertilizer Industries (Summer 2025)

- Read detailed engineering blueprints and conducted geotechnical soil investigations including laboratory soil tests and compaction evaluations.
- Gained exposure to heavy industrial steel structures and maintained strict compliance with occupational safety standards.

ENGINEERING PROJECTS & DIGITAL INNOVATIONS

CivilEng Mobile Application (Android APK) | Engineering Software Project (2026)

- Engineered and developed a standalone Android application designed to streamline daily on-site calculations for civil engineers.
- Features modules for rebar weight estimation, staircase structural design calculations, and material quantity surveying.

Civil Eng Pro Web Platform | *Web Development Project (2026)*

- Designed and launched a modern web platform (civil-eng-pro.vercel.app) serving as a digital hub for engineering tools and services.

G+3 Steel Building Structural Design | *Structural Engineering Project (2025 - 2026)*

- Performed complete 3D structural modeling and stress analysis in STAAD.Pro, preparing fabrication details and structural drawings according to AISC codes.

Residential Architectural & Structural Plans | *Design & Drafting Projects (Various)*

- Produced comprehensive architectural layouts and structural details for modern residential villas using AutoCAD and Revit.

PROFESSIONAL CERTIFICATIONS & TRAINING

- Occupational Health & Safety (OSHA) Certificate - MicroTechnic Company
- Civil Quality Control & Quality Assurance (QC/QA) Certificate - MicroTechnic Company
- MS Project Engineering Management Diploma
- ISO 9001 Inventory Management & Corrective Procedures Certificate

TECHNICAL & PROFESSIONAL SKILLS

- **Structural Software:** STAAD.Pro, AutoCAD, ETABS & SAFE, SAP2000 & Revit Structure.
- **Field & Site Management:** Blueprint Reading, Auto Level Surveying, Geotechnical Soil Testing, Schedule Tracking, QC/QA & OSHA Safety.
- **Project Management & Software:** MS Project & Microsoft Office.

LANGUAGES

- **Arabic:** Native Proficiency
- **English:** Upper-Intermediate (B1 / B2)
- **Spanish:** Elementary (A1 / A2)
